

Honda City

Sunday, 10 May 2009

The revised version of the Honda City certainly is a beautiful machine. The 2009 version features an all new design and personally I feel that you should definitely get a 2009 City instead of getting a Jazz/Fit.

Why?

The 2009 City looks a hundred times better and best of all, it's cheaper when compared to the Jazz/Fit. On the other hand, although the car is pretty new now, I'm sure that if you give it a couple more months, you'll see car designers rolling out their 'pimped' version of the City, with good looking body kit and kick ass interiors.

Here are some photos of the 2009 City for your viewing pleasure:
