

Volkswagen Scirocco R

Monday, 18 May 2009

Volkswagen has something new in store and it's none other than the Scirocco R model. This particular car features 265 horsepower and it seems that it utilizes Audi's S3 2.0 TFSI engine.

Personally, I just love the design of the car as it looks rather aggressive by style. I don't think that Volkswagen has produced many of aggressive looking cars in the past and I'm sure that the Scirocco R is a work well done.

The Volkswagen Scirocco R will be available sometime this September with a price tag of £26,000. If you ask me, £26,000 is pretty steep, but with a 265 horsepower engine under the hood, I think it's reasonable on the other hand.

Here are some photos of the Volkswagen Scirocco R:
