

2009 Honda CRV

Saturday, 23 May 2009

Apparently, Honda did some changes to their 2009 CRV and I'm not really a huge fan for their bodywork. The front bumper consists of this huge black thing that wraps around up to the front grill, pretty much resembles like a huge baby wearing Pampers. However, I do love what they did with the front lights, it gives the car a rather sharp outlook.

Apologies to the 2009 Honda CRV fans, but this car is a huge no-no.
