

2010 Saab 9-3X

Tuesday, 26 May 2009

The 2010 Saab 9-3X is a mean looking machine. This particular 4wd is designed give outdoor enthusiasts a ride of their life. Of course, I have to say that the car manufacturers did a really good job designing the front portion of the car, but sadly, the back looks nothing near magnificent.

On the other hand, the 2010 Saab 9-3X is powered by a 2.0-liter dohc turbocharged 4-cylinder with 207 bhp.

Here are some photos of the 2010 Saab 9-3X.
