

2009 Ford Flex

Wednesday, 27 May 2009

The 2009 Ford Flex is a rather odd looking machine. The car front portion resembles one of Ford Ranger's old model, but Ford did a really good job by giving the front grill some blings. Of course, if you need a crossover, I'm sure that the 2009 Ford Flex would definitely serve you well with tons of space inside.

Here are some photos of the 2009 Ford Flex.
